Subject: Re: RFI Status of Water / Wastewater Service To Customers in Beaumont, TX

Here's a partial response, from the Region 6 SitRep from 1700 on 9/3/2017:

BEAUMONT/PORT ARTHUR Beaumont's wastewater treatment plant (WWTP) is fully operational and running. All units are being powered by generator and are fully functional. The collection system has been effectively shut off due to power loss. The WWTP lost two pumps earlier, but they have been restored. The city is focusing the majority of its resources on the drinking water issues currently being experienced and then will begin assessing and working on the wastewater side.

Thanks.

KGS, please work with **ICUL** to have EPA and USACE confirm the below. This request is from NRCS Chief, we'd like substantive updates on Beaumont if possible. Please see specific questions below.

Also looping in RFIT so that this can be formally input into the tracker.
